About This Game

You play Sanjuro Makabe, a Mobile Combat Armor (MCA) pilot and Commander in the UCA Security Force. The UCA was originally formed by three dominant megacorporations (Andra Biomechanics, Armacham Technology Corporation, and Shogo Industries). Originally intended as a joint venture that would ensure the continued profitability of the three organizations that founded it, the UCA is now independent, and the dominant military power in existence.

Your mission is to locate and assassinate a rebel leader known only as Gabriel. All of the action takes place either on the planet Cronus or on the spaceship Leviathan. The Leviathan is the flagship of the UCA and is commanded by Admiral Akkaraju.

Cronus is the only known source of the biologically active material known as Kato, an incredibly powerful energy source essential to the process by which interstellar travel is possible.

Your deadly enemy is The Fallen, a fanatical terrorist group lead by the mysterious Gabriel, threatens the balance of power on Cronus, and ultimately, control of Kato. You will fight them on your feet or from within one of the different types of Mobile Combat Armor, a giant mech which can run, duck, strafe, swim or transform into an ultrafast hovortank.

You will know the true power of giant robots!

Awesome tower defense game. Great polish and mechanics.. Very simple concept, yet great game! A relaxing hidden object game for a lazy afternoon.. I was expecting more of a FIFA-style game, where you ACTUALLY GET SOME ACTION IN.

If you just like to see what's happening in letters without actually playing as the players, get this game! Otherwise, DO NOT GET THIS GAME!!!

3/10.. I deeply recommend this game if you like slow, obscure and depressive atmosphere. Do not expect a lot of action, the game mainly focuses on the aura of the sights and the ambience. To be honest I am not done with the play yet, but till now, I like it very much. It gives you the feeling of being a star in an awkward deeply dark and misunderstood film noir.. 3 hours and I finished all levels with 3 stars and all upgrades maxed out. For \$4.99, this is a good game and I feel like I got my money's worth out of it.

The Good: Cartoon art style fits the game's comedic aesthetic. The controls feel very fluid and responsive (very important is a brawler). Game runs very smooth for a port and all on screen icons matched my controller's buttons (so no tap this or swipe that icon instructions).

The Bad: Some levels artificially increase the difficulty by limiting the player's view by having foreground objects (like trees) take up 75% - 80% of the screen. Getting damaged by off screen enemies (such as the exploding chickens).. Stupendo se giocato con amici

This game is a solid bomberman clone that takes at most 3 minutes or so. A good game if you just want to unwind on something fun. Maybe a couple more power ups aside from the 3 basics but definitely solid. An amazing and wonderous experience! Virtually everything you see can be interacted with, shot, thrown or whatever you think of doing with it. The 'game' invites you to discover and try everything out, and boy there's tons of stuff to do.

Also a great introducing experience for VR-adapts, and I think kids will enjoy this too. (not too young though I'd say, as there are some mildly scary/impressive things to be seen). Just an average game, good for the completionists.

Game is kind of short, but the idea is to repeat and unlock lore by repeating and somehow changing your actions. The lore is kind of shaped by the previous iteration of hero you played.

Gameplay can be easy or difficult, all depends if you get these ice rain frequently. Also some characters are kind of difficult to play, or more exactly, requires meticulous approach (e.g. bard, meant ofr supporting).. wanted something different to a board game, something new. i found it. i don't care about other players and streaming etc, as i just wanted it for a few of the family, we logged in (in the same room quiz) it kicked off lol. brilliant fun. Nope. No. No thank you. It's not a game (you die within a few minutes) and the devs have been saying there will be an update soon. Goodbye a-holes.. Great Game.. epic trailer, but i think there is new favourite player... Hanameister. I'm maybe missing something, but it had microphone checkmarked and didn't record it, only did the main audio. And why is my cam see through? And why doesn't it know flv format, or idk avi is huge compared to xsplit. game capture mode is missing the options... can't figure out how to add camera to it. I'll check streaming and idk what happens if it crashes, but the layout is pretty awesome. If mp4 needs a new codex, how come we don't have that? idk how that works. The wav showed my voice picked up, but nothing recorded? I suggest trying this, or try xsplit which actualy detects what game you're in and can capture from only that if you want. if heavy 100 fps or so also means a file that's 20gb. I won't be able to use it, but I'm sure others can.. I'm absolutely loving this. Great, casual/puzzle gameplay loop, a lot of content (and a variety of content as well). It looks nice, runs well, plays smoothly. It's perfect for just casual play while listening to music / watching something.
